Course details

For full details including objectives, prerequisites and course outlines, please visit www.quadrasol.co.uk/support-training

Tailored training

In addition to the scheduled training courses outlined here, we can provide tailored courses to meet your specific needs and requirements. We also provide one-to-one courses on a regular basis.

Mobile Training Suite

We have invested in our training suite to make it mobile, meaning that we can provide our training at your premises or another location of your choice - all you'll need to do is provide the room!

Contact us for further details on any of the above.

“I went on a two day, one on one, advanced course at Quadra. The course was **very flexible** in that I was able to bring along notes that I had been making on functionality I had been struggling with, and this was covered in the course. The instructor built on these notes and covered the **advanced skills I would need to progress** from where I was, at that stage, also covering some of the not so visible software functionality which can speed up many of the tasks. Training is something which I think is necessary to be able to use all the diverse tools within any software, **without the training I received, I would have been phoning the Quadra technicians constantly so they could talk me through how to perform a variety of tasks.** I find the training at Quadra good and it is a service I would recommend.”

[DiGiCo UK Ltd](#)

“A colleague of mine is very well associated with the guys at Quadra and suggested I get booked onto their CADSTAR training course, which I did. **Their technician spent four days taking me through all the functionality and the tools available** and then I got started.”
